ABOUT LINIAR

THE UK'S TRUSTED NAME IN PVCU DECKING

With over 25 years' experience in decking production, Liniar is widely recognised as a leading force in British manufacturing and product development – combining deep industry expertise with innovation and sustainability.

As the UK's largest supplier of PVCu decking to holiday parks, Liniar is trusted by major caravan and leisure operators nationwide. This proven track record means you can choose Liniar decking with confidence.

UK DECKING SYSTEM MANUFACTURER SINCE 1999

LINIAR DECKING RANGE

**THREE DISTINCTIVE STYLES
MANY POSSIBILITIES**

SwitchBoard®
SwitchBoard® Ultra
Rapt

Liniar’s decking range includes three styles incorporating multiple deckboard technologies (hollow, solid-core, reversible, and foiled finishes). These are complemented by matching ancillaries.

Liniar PVCu decking offers a smart, modern alternative to traditional timber, combining lasting performance with effortless upkeep.

Designed for busy lifestyles, it requires no sanding, staining or sealing. Its durable, weather-resistant construction stands up to the challenges of the UK climate and delivers a safe, stylish and long-lasting outdoor space you can rely on.

ROBUST
Will not warp, bend, decay, rust or stain

CARE
Requires no painting or sanding. Simply clean with soapy water

FAMILY FRIENDLY
Slip resistant, splinter-free and barefoot friendly

FIRE RESISTANT
British fire safety testing standards Class 1

SUSTAINABLE CHOICE
Contains recycled material and is fully recyclable

A smart hollow design combining reduced weight with a strong, supported internal structure.

LINIAR DECKING RANGE

SwitchBoard®

SwitchBoard is an enduringly popular choice delivering an excellent balance of strength and character. Comfortable and stable underfoot, it blends timber-inspired styling with dependable everyday performance.

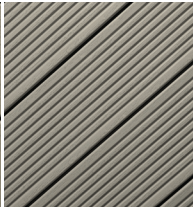

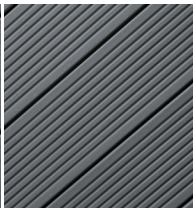

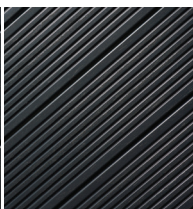

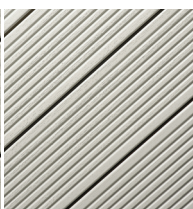

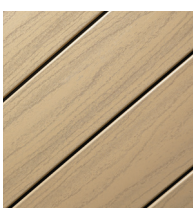

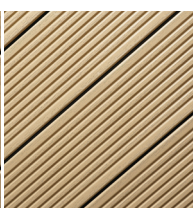

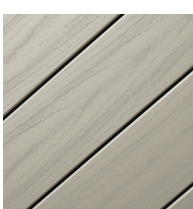

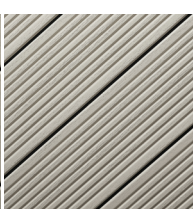

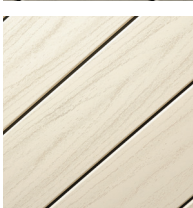

UV stable and fully reversible, SwitchBoard combines a contemporary look and feel with low-maintenance convenience for a versatile, robust decking solution.

FULLY REVERSIBLE
Choice of grooved or woodgrained finish

 150MM DECKBOARD

		Pewter
		Anthracite
		Agate Grey
		Clay
		Natural
		Ivory

A solid core deckboard featuring
deeply embossed 3D texturing
for a premium look and feel.

LINIAR DECKING RANGE

SwitchBoard® Ultra

SwitchBoard Ultra closely captures the visual and tactile appeal of timber, while the core density also provides acoustic dampening making the boards quieter underfoot.

UV stable and fully reversible, SwitchBoard Ultra combines the performance benefits of PVCu with a premium look and feel closer to traditional timber.

FULLY REVERSIBLE

Choice of grooved or woodgrained finish

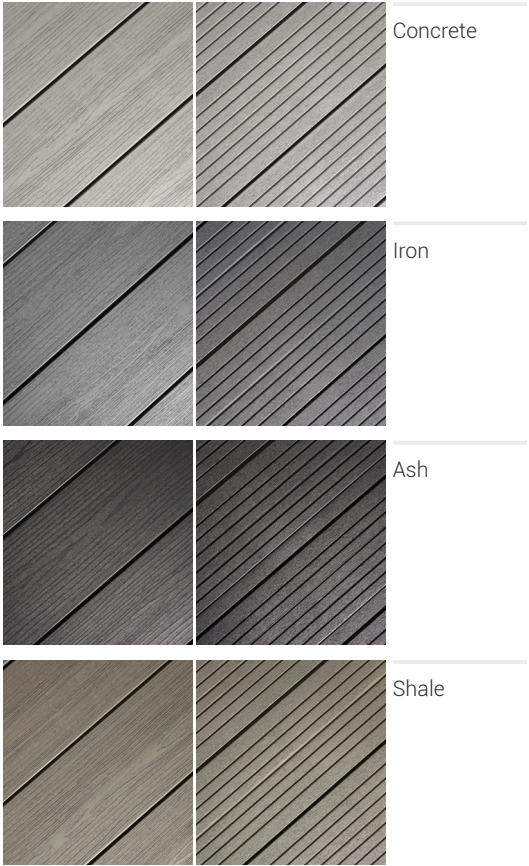

PREMIUM FEEL & TEXTURE

Deep embossed surface on both sides

 180MM DECKBOARD

Lightweight, yet strong
and finished using Renolit's
hardwearing GEOFOL foil.

LINIAR DECKING RANGE

Rapt

Rapt delivers the low-maintenance convenience of PVCu while capturing the visual aesthetic of materials such as timber more accurately than ever!

Rapt is the perfect choice for those wanting the performance benefits of PVCu, the superior grip, UV and scratch resistance of a foiled finish, with the mirroring of natural textures in vibrant detail

REALISTIC DETAILING

Foil laminate captures vibrant detailing

150MM DECKBOARD

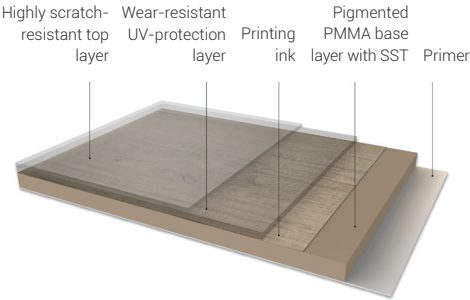

Mountain Oak

Valley Oak

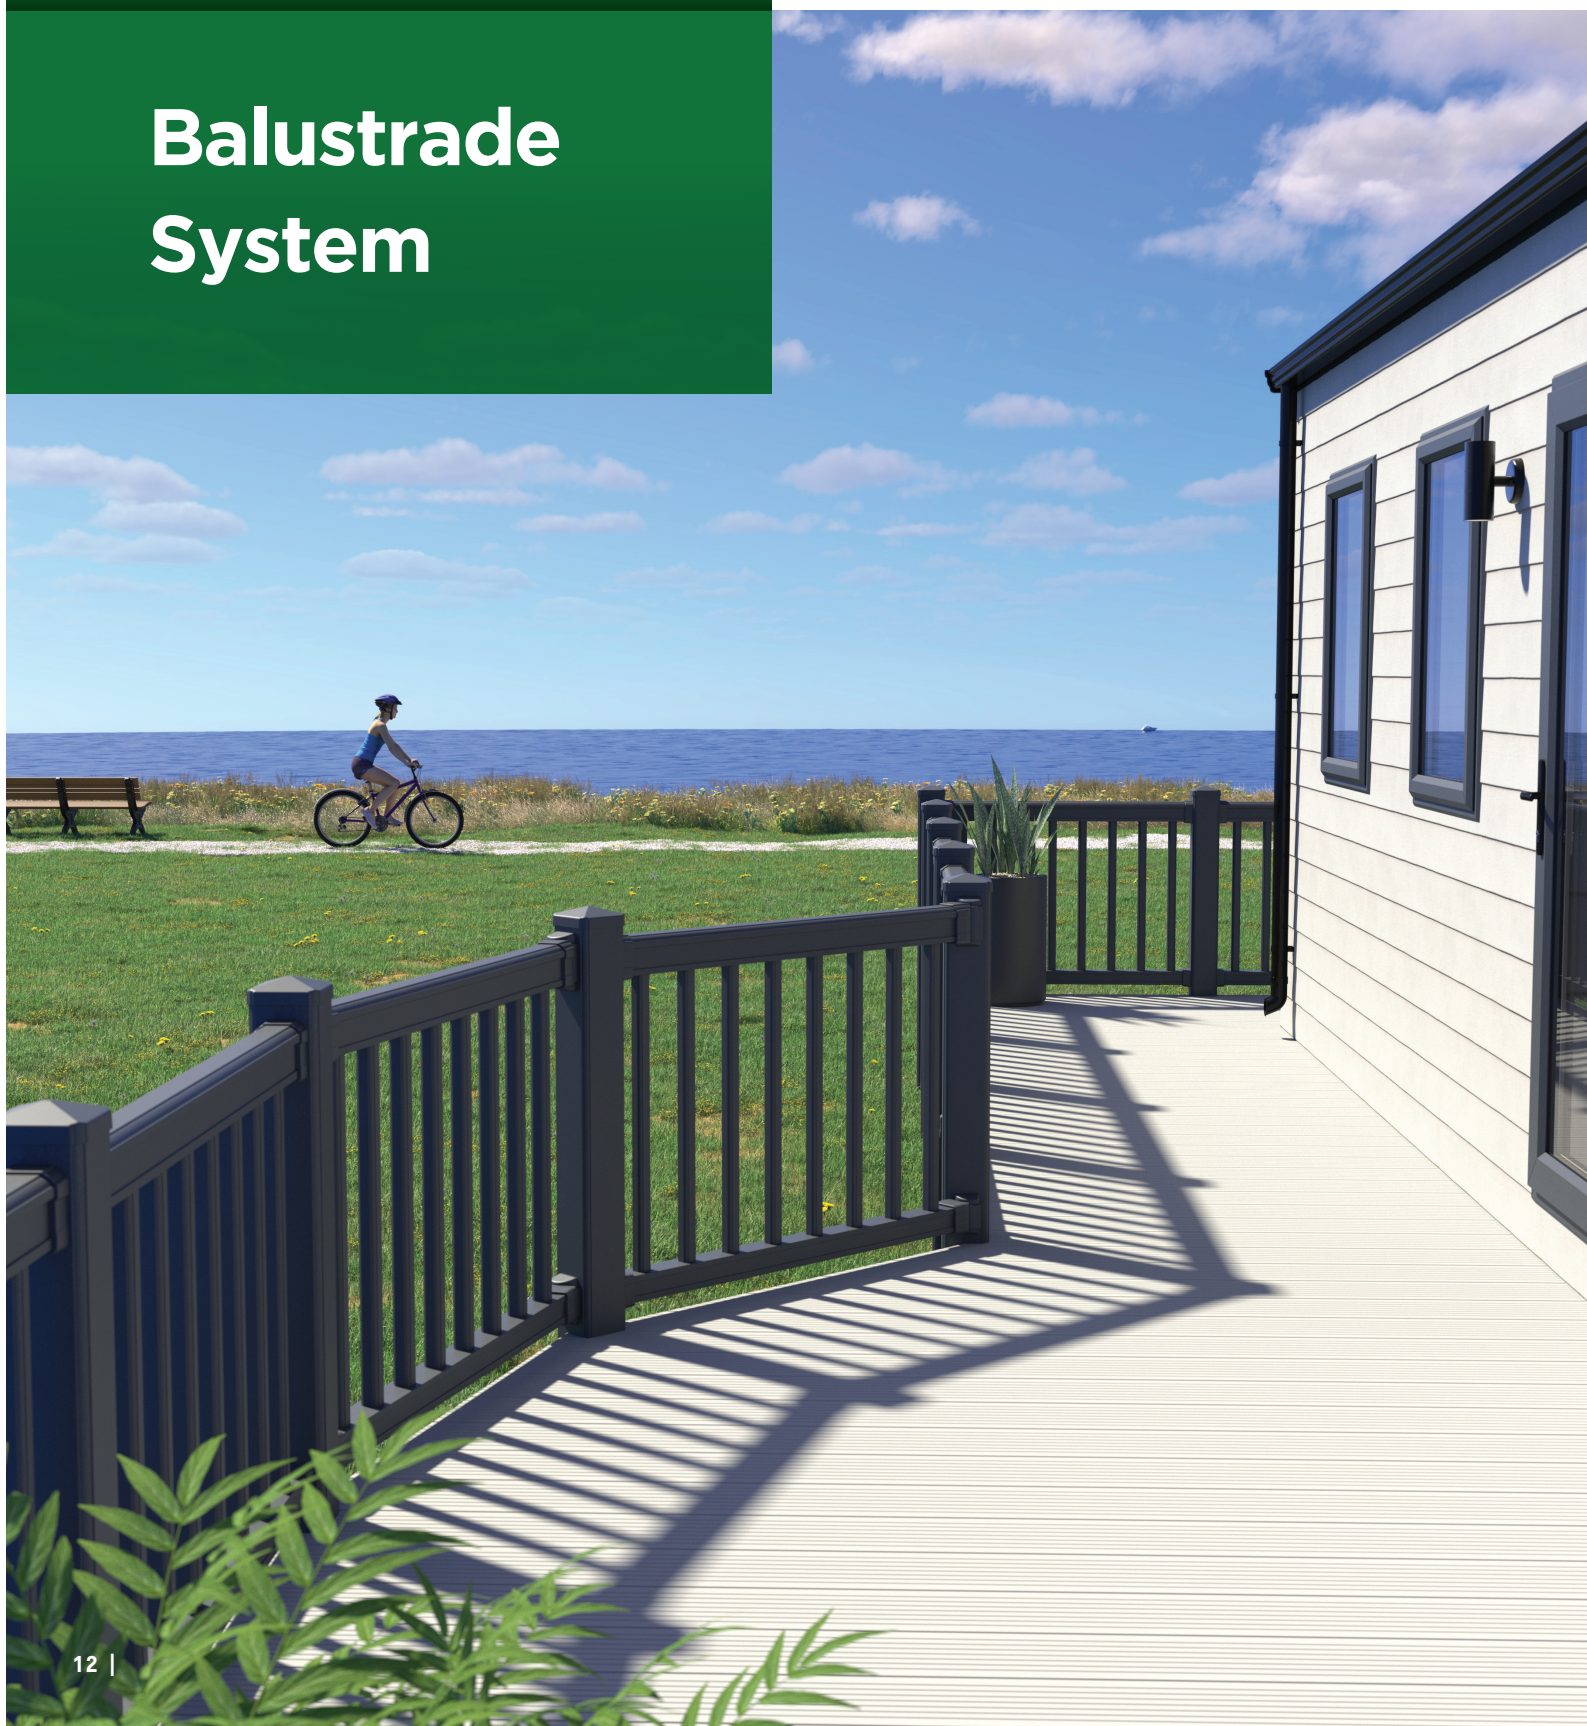

Structure of the exterior film
RENOLIT GEOFOL FH

Experience a premium finish with
the UK's only fully sculptured
PVCu balustrade system.

LINIAR DECKING RANGE

Balustrade System

Linlar balustrade system is engineered for strength, security and BS 6180 compliance.

Adjustable brackets enable bespoke decking shapes,

while a wide choice of colours and stylish accessories – including lighting, glass options and gates – enhance guest appeal and outdoor space functionality.

LINIAR DECKING RANGE

Accessories

Complete your deck with accessories designed to do more than just complement – they elevate.

From perfectly matched gates that define and secure your space, to integrated lighting that brings warmth and atmosphere long after sunset, our accessories range transforms your decking into a truly finished outdoor living area.

Every element is crafted to work seamlessly together, delivering a clean, cohesive result that feels considered, premium, and built to last.

EASY ORDERING**

SKIRTING

Ensure your entire decking is built to last with a strong, durable and weatherproof sub-frame.

LINIAR DECKING RANGE

Subframe

Our galvanised steel subframe provides a robust foundation for all Liniar PVCu decking systems. Built for strength and stability, its load bearing capacity can support heavier decking spans, delivering long-term structural support and a level consistent base.

More durable than untreated steel or timber, the galvanised finish prevents rust and is maintenance

free, even in wet outdoor environments.

All Liniar decking is compatible with both steel and timber subframes, discuss your specific requirements with your chosen installer for guidance and advice on available options. GG leisure use timber subframe as standard and steel can be quoted as an upgrade.

**ENHANCED
STRENGTH
& STABILITY**

**FIRE
RESISTANT**

**CORROSION
RESISTANT**

DECKING CARE

No maintenance is required for the Liniar decking system.

If your decking does need a clean we recommend washing with warm, soapy water. Use a cloth to clean the handrails and posts and wipe dry, and use a bristled brush to clean the deckboards.

Do not use glass cleaner on the deckboards or balustrades or any type of bleach, solvent (e.g. white spirit, methylated spirit, nail varnish) or adhesives.

We recommend that hot surfaces such as barbecues are not used in association with PVCu decking.

Some rubber-backed mats can cause discolouration of deckboards over time.

Some brands of suncream can also stain foiled finishes on balustrades, please take care.

As with most surfaces, footwear should be worn to protect feet in hot weather.

G G LEISURE
HOLIDAY HOME DECKING

“ This decking feels solid, safe underfoot, and doesn't splinter like traditional timber. It's reassuring knowing it will stay looking great for years with hardly any upkeep even with typical British weather. ”

“ With so many finishes and system components available, it allows us to build fully bespoke layouts with ease. It gives us genuine flexibility to deliver tailored, high-quality outdoor spaces every time. ”

“ Knowing Liniar's decking meets British Standards Institution requirements makes specification simple and gives real peace of mind. It helps us stay consistent across the park while meeting all necessary regulations. ”

PRODUCT RANGE: WINDOWS | DOORS | GLAZED ROOFS | GARDEN ROOMS | FENCING | DECKING | SOFFITS & FASCIAS | CLADDING | PILING
